#### **STATEMENT**

## **Purpose**

To define and describe the accepted indications for Pemazyre (pemigatinib) usage in the treatment of cancer, including FDA approved indications, and off-label indications.

Evolent is responsible for processing all medication requests from network ordering providers. Medications not authorized by Evolent may be deemed as not approvable and therefore not reimbursable.

The use of this drug must be supported by one of the following: FDA approved product labeling, CMS-approved compendia, National Comprehensive Cancer Network (NCCN), American Society of Clinical Oncology (ASCO) clinical guidelines, or peer-reviewed literature that meets the requirements of the CMS Medicare Benefit Policy Manual Chapter 15.

#### **INDICATIONS**

Continuation requests for a not-approvable medication shall be exempt from this Evolent policy provided

- The member has not experienced disease progression on the requested medication AND
- The requested medication was used within the last year without a lapse of more than 30 days of having an active authorization AND
- Additional medication(s) are not being added to the continuation request.

# Cholangiocarcinoma

- Pemazyre (pemigatinib) use as a single agent is supported when ALL of the following criteria are met:
  - o The member has unresectable or metastatic cholangiocarcinoma with disease progression on or after one prior therapy AND
  - A positive test for fibroblast growth factor receptor 2 (FGFR2) gene fusion or rearrangement is confirmed in the tumor cell by an approved test (Foundation One CDX test or another gene sequencing test).

# Myeloid/Lymphoid Neoplasms (MLNs)

 Pemazyre (pemigatinib) may be used as monotherapy in a member who has relapsed after stem cell transplantation and/or after disease modifying therapies (e.g., chemotherapy) for the treatment of MLNs, and the tumor is positive for fibroblast growth factor receptor 1 (FGFR1) rearrangement.

# **CONTRAINDICATIONS/WARNINGS**

None

#### **EXCLUSION CRITERIA**

- Disease progression while receiving Pemazyre (pemigatinib) or on prior FGFR2 inhibitor therapy [e.g., Lytgobi (futibatinib)].
- No confirmatory test is available to confirm the presence of an FGFR2 (for cholangiocarcinoma) or FGFR1 (for MLNs) gene fusion/gene rearrangement.
- Dosing exceeds single dose limit of Pemazyre (pemigatinib) 13.5 mg.
- For Cholangiocarcinoma: Treatment exceeds the maximum limit of 14 (4.5 mg), 14 (9 mg), or 14 (13.5 mg) tablets/month.
- For MLNs: Treatment exceeds the maximum limit of 28 (4.5 mg), 28 (9 mg), or 28 (13.5 mg) tablets/month.
- Investigational use of Pemazyre (pemigatinib) with an off-label indication that is not sufficient in evidence or is not generally accepted by the medical community.
   Sufficient evidence that is not supported by CMS recognized compendia or acceptable peer reviewed literature is defined as any of the following:
  - Whether the clinical characteristics of the patient and the cancer are adequately represented in the published evidence.
  - Whether the administered chemotherapy/biologic therapy/immune therapy/targeted therapy/other oncologic therapy regimen is adequately represented in the published evidence.
  - o Whether the reported study outcomes represent clinically meaningful outcomes experienced by patients. Generally, the definitions of Clinically Meaningful outcomes are those recommended by ASCO, e.g., Hazard Ratio of less than 0.80 and the recommended survival benefit for OS and PFS should be at least 3 months.
  - Whether the experimental design, considering the drugs and conditions under investigation, is appropriate to address the investigative question. (For example, in some clinical studies, it may be unnecessary or not feasible to use randomization, double blind trials, placebos, or crossover).
  - o That non-randomized clinical trials with a significant number of subjects may be a basis for supportive clinical evidence for determining accepted uses of drugs.
  - That case reports are generally considered uncontrolled and anecdotal information and do not provide adequate supportive clinical evidence for determining accepted uses of drugs.
  - That abstracts (including meeting abstracts) without the full article from the approved peer-reviewed journals lack supporting clinical evidence for determining accepted uses of drugs.

# **CODING AND STANDARDS**

#### Codes

J8999 - pemigatinib

# **Applicable Lines of Business**

	CHIP (Children's Health Insurance Program)
$\boxtimes$	Commercial
$\boxtimes$	Exchange/Marketplace
$\boxtimes$	Medicaid
	Medicare Advantage

### **POLICY HISTORY**

Date	Summary	
July 2025	Converted to new Evolent guideline template	
	This guideline replaces UM ONC_1398 Pemazyre (pemigatinib)	
	Updated indication section	
	Updated maximum dosage form quantities in exclusion criteria	
	Updated exclusion criteria	
	Updated references	
July 2024	Updated NCH verbiage to Evolent	

#### **LEGAL AND COMPLIANCE**

# **Guideline Approval**

#### Committee

Reviewed / Approved by Evolent Specialty Clinical Guideline Review Committee

#### **Disclaimer**

Evolent Clinical Guidelines do not constitute medical advice. Treating health care professionals are solely responsible for diagnosis, treatment, and medical advice. Evolent uses Clinical Guidelines in accordance with its contractual obligations to provide utilization management. Coverage for services varies for individual members according to the terms of their health care coverage or government program. Individual members' health care coverage may not utilize some Evolent Clinical Guidelines. Evolent clinical guidelines contain guidance that requires prior authorization and service limitations. A list of procedure

codes, services or drugs may not be all inclusive and does not imply that a service or drug is a covered or non-covered service or drug. Evolent reserves the right to review and update this Clinical Guideline in its sole discretion. Notice of any changes shall be provided as required by applicable provider agreements and laws or regulations. Members should contact their Plan customer service representative for specific coverage information.
