

Medicare Beneficiary Identifier on MDS Assessments in Skilled Nursing Facilities

Neighborhood News – April 2026

Neighborhood would like to remind skilled nursing facility providers of the importance of including the Medicare Beneficiary Identifier (MBI) on all Minimum Data Set (MDS) assessments.

The MBI is captured in Section A (Identification Information) of the MDS and is a required field. Submission of MDS assessments without a valid MBI may prevent Neighborhood from accurately matching assessments within our systems.

Incomplete or unmatched assessments may impact care management activities and required reporting to CMS.
