

Effective date: 5/1/2020
Reviewed: 2/2020, 2/2021, 11/2021, 2/2022, 4/2023, 3/2024, 4/2025, 6/2026
Scope: Medicaid

WAKIX (pitolisant)

POLICY

I. INDICATIONS

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met, and the member has no exclusions to the prescribed therapy.

FDA-Approved Indication

1. Treatment of excessive daytime sleepiness (EDS) or cataplexy in patients 6 years of age and older with narcolepsy.

All other indications are considered experimental/investigational and not medically necessary.

II. CRITERIA FOR INITIAL APPROVAL

A. Member has one of the following:

a. Excessive Daytime Sleepiness with Narcolepsy

Authorization of 6 months may be granted for treatment of excessive daytime sleepiness (EDS) in patients 6 years of age and older with narcolepsy when all of the following criteria are met:

- i. Documented diagnosis of narcolepsy is confirmed by a sleep lab evaluation
- ii. Wakix is prescribed by, or in consultation with a sleep disorder specialist or Neurologist
- iii. Documentation that the member has experienced an inadequate treatment response, intolerance, or contraindication to a central nervous system (CNS) stimulant (i.e., amphetamine, dextroamphetamine, methylphenidate)
- iv. If the member is 18 years of age or older: Documentation that the member has experienced an inadequate treatment response, intolerance to armodafinil or modafinil OR the member has a contraindication to both armodafinil and modafinil AND Documentation that the member has experienced an inadequate treatment response, intolerance or contraindication to Sunosi (solriamfetol)

b. Cataplexy with Narcolepsy

Authorization of 6 months may be granted for the treatment of cataplexy in patients 6 years of age and older with narcolepsy when all of the following criteria are met:

- i. Documented Diagnosis of narcolepsy is confirmed by a sleep lab evaluation
- ii. Wakix is prescribed by, or in consultation with a sleep disorder specialist or Neurologist
- iii. Documentation that the member has a baseline history of at least 3 cataplexy attacks per week

Effective date: 5/1/2020
Reviewed: 2/2020, 2/2021, 11/2021, 2/2022, 4/2023, 3/2024, 4/2025, 6/2026
Scope: Medicaid

- iv. Documentation that the member has experienced an inadequate treatment response, intolerance, or contraindication to at least two of the following agents from a different drug class: atomoxetine, fluoxetine, clomipramine and/or venlafaxine

III. CONTINUATION OF THERAPY

Authorization of 6 months may be granted for continued treatment of adult and pediatric patients 6 years of age and older with excessive daytime sleepiness (EDS) or cataplexy with narcolepsy when the member has demonstrated and documented beneficial response to treatment with pitolisant therapy, defined as one of the following (documentation provided):

1. A reduction in symptoms of daytime sleepiness from baseline
2. Decrease in cataplexy episodes from baseline

IV. QUANTITY LIMIT

Wakix 4.45mg & 17.8mg has a quantity limit of 2 tablets per day.
