

Medicaid Pharmacy Benefit Changes

Neighborhood News – October 2026

Effective October 1, 2026, certain GLP-1 medications used solely for weight management will no longer be covered on Neighborhood's Medicaid Formulary. This change also applies to Neighborhood INTEGRITY for Duals members who are accessing these medications for weight management on the Medicaid portion of their plan.

Current authorizations will be terminated as of September 30, 2026.

Products currently on Formulary that will be impacted by this change are listed below.

- Saxenda (liraglutide)
- Wegovy (semaglutide)
- Zepbound (tirzepatide)

If continued treatment with one of these medications listed above is medically necessary for an indication other than weight management, providers must submit a new PA request with the appropriate clinical documentation.

These changes do not affect Neighborhood Members with Commercial or Dual CONNECT insurance.
