

## SPECIALTY GUIDELINE MANAGEMENT

### Nitisinone (generic Orfadin) capsules Nityr (nitisinone) tablets Orfadin (nitisinone) suspension

## POLICY

### I. INDICATIONS

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

#### FDA-Approved Indication

Orfadin is indicated for the treatment of adult and pediatric patients with hereditary tyrosinemia type 1 (HT-1) in combination with dietary restriction of tyrosine and phenylalanine.

Nityr is indicated for the treatment of adult and pediatric patients with hereditary tyrosinemia type 1 (HT-1) in combination with dietary restriction of tyrosine and phenylalanine.

All other indications are considered experimental/investigational and are not a covered benefit.

### II. CRITERIA FOR INITIAL APPROVAL

Authorization of 6 months may be granted for treatment of hereditary tyrosinemia type 1 (HT-1) when the diagnosis is confirmed by biochemical testing (e.g., detection of succinylacetone in urine) or DNA testing.

If requesting brand Orfadin (nitisinone), documentation provided of failure or intolerance to generic nitisinone capsules AND Nityr (nitisinone) tablets.

If requesting the oral suspension, documentation provided that the member is unable to tolerate/swallow the oral tablet AND capsule.

### III. CONTINUATION OF THERAPY

Authorization of 6 months for all members (including new members) requesting authorization for continuation of therapy must meet all initial authorization criteria and the member shows evidence of positive clinical response (e.g. decrease in urinary/plasma succinylacetone and alpha-1-microglobulin levels) while on therapy.

Effective Date: 6/2019
Revised: 10/2019, 06/2020
Reviewed: 6/2019, 10/2019, 6/2020, 3/2021, 3/2022
Scope: Medicaid
