# SPECIALTY GUIDELINE MANAGEMENT

# POMALYST (pomalidomide)

# POLICY

## I. INDICATIONS

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

## A. FDA-Approved Indications

- 1. Treatment of multiple myeloma, in combination with dexamethasone, in adult patients who have received at least two prior therapies including lenalidomide and a proteasome inhibitor and have demonstrated disease progression on or within 60 days of completion of their last therapy
- 2. Treatment of adult patients with AIDS-related Kaposi sarcoma (KS) after failure of highly active antiretroviral therapy (HAART) or in adult patients with KS who are HIV-negative

## B. Compendial Uses

- 1. Systemic light chain amyloidosis
- 2. Primary central nervous system lymphoma
- 3. POEMS (polyneuropathy, organomegaly, endocrinopathy, monoclonal protein, skin changes) syndrome
- 4. Multiple myeloma

All other indications are considered experimental/investigational and not medically necessary.

# **II. CRITERIA FOR INITIAL APPROVAL**

# A. Multiple myeloma

Authorization of 12 months may be granted for treatment of multiple myeloma when any of the following criteria are met:

- The member has previously received at least two prior therapies for multiple myeloma including an immunomodulatory agent and proteasome inhibitor and the requested medication will be used in one of the following regimens:
  - i. In combination with elotuzumab and dexamethasone
  - ii. In combination with ixazomib and dexamethasone
  - iii. In combination with bortezomib and dexamethasone
  - iv. In combination with cyclophosphamide and dexamethasone
  - v. In combination with isatuximab-irfc and dexamethasone
  - vi. In combination with dexamethasone
  - vii. In combination with selinexor and dexamethasone
  - viii. As a single agent
- 2. The member has previously received at least one prior therapy for multiple myeloma including an immunomodulatory agent and a proteasome inhibitor and the requested medication will be used in combination with daratumumab and dexamethasone
- 3. The member has previously received at least one prior therapy for multiple myeloma and the requested medication will be used in combination with carfilzomib and dexamethasone

### B. Systemic light chain amyloidosis

Authorization of 12 months may be granted for treatment of relapsed or refractory systemic light chain amyloidosis in combination with dexamethasone.

### C. Kaposi Sarcoma

Authorization of 12 months may be granted for the treatment of Kaposi sarcoma when either of the following criteria are met:

- 1. The requested medication will be used in combination with antiretroviral therapy for the treatment of AIDS-related Kaposi sarcoma
- 2. Member is HIV-negative

### D. Primary central nervous system lymphoma

Authorization of 12 months may be granted for treatment of primary central nervous system lymphoma as a single agent.

### E. POEMS syndrome

Authorization of 12 months may be granted for treatment of POEMS syndrome in combination with dexamethasone.

## **III. CONTINUATION OF THERAPY**

Authorization of 12 months may be granted for continued treatment in members requesting reauthorization for an indication listed in Section II when there is no evidence of unacceptable toxicity or disease progression while on the current regimen.
