

Upcoming Medicaid Pharmacy Benefit Preferred Therapy Changes

Neighborhood News – January 2024

Effective **February 1, 2024**, Neighborhood Health Plan of Rhode Island (Neighborhood) is updating its Medicaid **Pharmacy Benefit** formulary. Neighborhood now prefers UBRELVY TAB 50MG & 100MG and will be removing NURTEC TAB 75MG ODT from the formulary.

Members who are currently prescribed Nurtec ODT will be permitted to continue their treatment until their existing authorization expires.

Authorization requirements for Ubrelvy can be found on the Neighborhood's [Criteria and Clinical Medical Policies page](#).

Please note, this change does not affect Neighborhood members enrolled in Commercial or INTEGRITY insurance plans.
