SPECIALTY GUIDELINE MANAGEMENT

FASLODEX (fulvestrant) fulvestrant

POLICY

I. INDICATIONS

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

A. FDA-Approved Indications

Faslodex is indicated for the treatment of:

- 1. Hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative advanced breast cancer in postmenopausal women not previously treated with endocrine therapy.
- 2. HR-positive advanced breast cancer in postmenopausal women with disease progression following endocrine therapy.
- 3. HR-positive, HER2-negative advanced or metastatic breast cancer in postmenopausal women in combination with ribociclib, as initial endocrine based therapy or following disease progression on endocrine therapy.
- 4. HR-positive, HER2-negative advanced or metastatic breast cancer in combination with palbociclib or abemaciclib in women with disease progression after endocrine therapy

B. Compendial Uses

- 1. Breast cancer
- 2. Low grade serous ovarian carcinoma
- 3. Endometrial carcinoma
- 4. Uterine sarcoma

All other indications are considered experimental/investigational and not medically necessary.

II. DOCUMENTATION

Submission of hormone receptor (HR) status is necessary to initiate the prior authorization review, where applicable.

III. CRITERIA FOR INITIAL APPROVAL

A. Breast Cancer

Authorization of 12 months may be granted for treatment of recurrent, advanced, or metastatic HR-positive breast cancer.

B. Low Grade Serous Ovarian Carcinoma

2903-A

Authorization of 12 months may be granted for treatment of recurrence of low-grade serous ovarian carcinoma as a single agent for members who previously received an aromatase inhibitor (e.g., letrozole, anastrozole, exemestane).

C. Endometrial carcinoma

Authorization of 12 months may be granted for treatment of endometrial carcinoma as a single agent.

D. Uterine sarcoma

Authorization of 12 months may be granted for treatment of low-grade endometrial stromal sarcoma (ESS), adenosarcoma without sarcomatous overgrowth, or estrogen receptor/ progesterone receptor positive (ER/PR+) uterine sarcomas as a single agent.

IV. CONTINUATION OF THERAPY

Authorization of 12 months may be granted for continued treatment in members requesting reauthorization for an indication listed in Section III when there is no evidence of unacceptable toxicity or disease progression while on the current regimen.
