
Removal of PCP Requirement for Immunizations and Vaccines

Neighborhood News – April 2025

Neighborhood has updated its [Immunization and Vaccine Payment Policy](#) to enhance access to essential vaccines and immunizations. Effective retroactively from **August 1, 2024**, the requirement for members to receive immunizations from their primary care provider (PCP) has been removed. This change allows members to obtain necessary immunizations from any in-network provider, facilitating easier access to vital preventive care.

Any claims affected by this policy change will be automatically identified and reprocessed; no action is required from providers. Providers are encouraged to review the updated policy for detailed information.
